GCI is the largest telecommunications company in Alaska. The company's cable plant, which provides voice, video, and broadband data services, passes 90 percent of Alaska households. GCI operates Alaska's most extensive terrestrial/subsea fiber optic network, which by the end of 2008, will connect not only Anchorage but also Fairbanks, and Juneau/Southeast to the lower 48 states with a diversely routed, protected fiber network. The company's satellite network provides communications services to small towns and villages throughout rural Alaska. GCI is now in the process of constructing Alaska's first truly statewide mobile wireless network, which will seamlessly link urban and rural Alaska for the first time in the state's history.

A pioneer in bundled services, GCI is the top provider of voice, data, and video services to Alaska consumers with a 70 percent share of the consumer broadband market.
