c) A wireless line in service is defined as a wireless device with a monthly fee for services. Wireless lines in service as of September 30, 2024 include 1,800 lines that were reclassified from GCI Business to GCI Consumer lines in the first quarter of 2024 and are not new additions.

Unless otherwise noted, the following discussion compares financial information for the three months ended September 30, 2024 to the same period in 2023.

GCI revenue increased 9% in the third quarter. Consumer revenue increased 2% driven by growth in data revenue. Business revenue increased 16% driven by a strong upgrade cycle in schools and healthcare corporations in remote Alaska.

Operating income and Adjusted OIBDA increased \$12 million and \$11 million, respectively, in the third quarter in line with higher revenue, partially offset by increased operating and selling, general and administrative expenses. Operating expenses grew driven by higher distribution costs to healthcare, education and consumer customers. Selling, general and administrative expenses grew due to increases in labor-related and software subscription costs, partially offset by lower lease expense.

In the third quarter, GCI spent \$39 million, net, on capital expenditures. Capital expenditure spending was related primarily to improvements to the wireless and data networks in rural Alaska. GCI's net capital expenditures for the full year 2024 are expected to be approximately \$200 million related to additional high-returning investments in middle and last mile connectivity, with continued network expansion in GCI's most important markets in rural Alaska including the Bethel and AU-Aleutians fiber projects.

## NON-GAAP FINANCIAL MEASURES

To provide investors with additional information regarding our financial results, this press release includes a presentation of Adjusted OIBDA, which is a non-GAAP financial measure, for Liberty Broadband (and certain of its subsidiaries) and GCI Holdings together with a reconciliation to that entity or such businesses' operating income, as determined under GAAP. Liberty Broadband defines Adjusted OIBDA as operating income (loss) plus depreciation and amortization, stock-based compensation, transaction costs, separately reported litigation settlements, restructuring and impairment charges. Further, this press release includes Adjusted OIBDA margin which is also a non-GAAP financial measure. Liberty Broadband defines Adjusted OIBDA margin as Adjusted OIBDA divided by revenue.

Liberty Broadband believes Adjusted OIBDA is an important indicator of the operational strength and performance of its businesses by identifying those items that are not directly a reflection of each business' performance or indicative of ongoing business trends. In addition, this measure allows management to view operating results and perform analytical comparisons and benchmarking between businesses and identify strategies to improve performance. Because Adjusted OIBDA is used as a measure of operating performance, Liberty Broadband views operating income as the most directly comparable GAAP measure. Adjusted OIBDA is not meant to replace or supersede operating income or any other GAAP measure, but rather to supplement such GAAP measures in order to present investors with the same information that Liberty Broadband's management considers in assessing the results of operations and performance of its assets. Please see the tables below for applicable reconciliations.
